MO\$ES

Mathematically formalize and measure "signal" in large language models
use that measurement as a **constitutional layer** to govern AI and agentic
systems at point of execution.

What TCP/IP did for data, MO\$ES™ does for AI and Agentic Infra, by
preserving semantic meaning and intent.

for us operators

THE GAP

No evals or metrics exist for
operator contribution to
AI systems.

Every benchmark measures the model.
None measure the person running it.

INTRODUCING · COMMITMENT THEORY

Commitment emerges when
you apply **thermodynamics,**
laws of nature, and physics
to language.

*Shannon bracketed semantics in 1948.
MOSES™ opens the bracket — with an external conservation
constraint and executable enforcement.*

THE MISSING LAYER

The AI stack has models. Observability. Orchestration. It has no **governance primitive**.

WHY NOW

- I** Agent commerce enters production 2026 — autonomous AI actors need governance *before* they transact, not audit after.
- II** No benchmark measures operator-augmented AI work. MOSES™ creates and owns that category.
- III** Conservation Law published and openly falsifiable for ~4 months. Patents filed. Legal claim on the productivity layer is in process.
- IV** EU AI Act, US executive orders on AI provenance converging toward mandatory governance surfaces.

FOUNDER

Deric J. McHenry

Founder · MOSES™ · Buffalo, NY · Sole architect of the substrate, the patents, and ev

deric.mchenry@gmail.com · 716.260.0603 · BURNMYDAYS@PROTON.ME · @B

Operator background. 15+ years founding and running DJMP Inc. — built a B contracting company from zero to \$1M/yr, team of 40, projects from \$10k to \$50 Services (2012–2018) and KEDS (2006–2008).

Why this. When I started running governed AI across my own operation, the lea the operator out. The augmentation layer was invisible. So I built it, patented it, p and ran it against the field. #1 across all five kernels is the receipt.

Why now. Agent commerce enters production in 2026. Four patents filed, law o shipped solo. The window to set the standard is open and short.
